SUMMARY

STATUTORY AUTHORITY

- Sections 135.200 to 135.270, RSMo
- Pursuant to SB 1155 (2004), the Enterprise Zone tax benefit program is being phased out of existence.

PURPOSE

To provide tax incentives which promote and facilitate the expansion of new and/or existing businesses in Missouri's many enterprise zones.

PROGRAM DESCRIPTION

The eligible project must be located in one of Missouri's "enterprise zones." Enterprise zones are specified geographic areas as set forth by statute and certified by the Department of Economic Development (DED). Designations are based on demographic eligibility and approval of a request by the local government. The number of zones that may be certified is limited by law.

Facility eligibility is determined by its primary Standard Industrial Classification (SIC) or North American Industrial Classification System (NAICS) code, and includes manufacturing, warehousing, wholesale distribution, mining, insurance, research and development, recycling operations, computer-related services, and certain office activities.

To receive credits, a facility must create at least two new jobs and make a new investment equal to or in excess of \$100,000 (\$1,000,000 for replacement facilities) in the claimed year as compared to the base year (the year prior to a facility's commencement of operations). The investment credits are based on the original cost of machinery, equipment, furniture, fixtures, land and building, and/or eight times the annual rental rate paid for the same, excluding inventory.

Credits may be issued for each of ten years after the commencement of operations, unless the life of the enterprise zone expires first. Local property tax abatement, a state income tax exemption, and state income tax credits may be provided as business incentives, based on the following factors:

- new jobs created at the facility;
- enterprise zone residents employed by the facility;
- employees classified as "difficult to employ", or special;
- training for zone residents or employees classified as difficult to employ; and
- the amount of new investment at the qualifying facility.

MISSOURI ECONOMIC IMPACT

For the period FY2006-2010, the Enterprise Zone program generated \$507,069,001 in net new investments, and created 1,654 net new jobs for Missouri compared to the base year*. State costs amounted to \$76,291,578 in tax credits issued. Most counties generated net new investments and created new jobs while increasing the county average wage. Unfortunately during this time frame which included the recession that began in 2008, the net unemployment rate rose in zones throughout the state.

MISSOURI ENTERPRISE ZONE PERFORMANCE

While the program generated considerable investment over fiscal years 2006-2010, the number of businesses participating in the program continues to decrease, due primarily to zone and benefit expirations. As of December 31, 2010, 58 of the 72 enterprise zone designations had expired, with four zones to follow in the next five years. Because the MO Enterprise Zone program is sunset, the Department expects to see a continuing decline in the program's economic impact as zones continue to expire.

Kansas City's enterprise zone (zone 17) had over \$100,000,000 in net new investment while creating 116 new jobs. The zone's labor force increased about 1.5% with the county average wage increasing 14.7%.

Buchanan County's enterprise zone (zone 18) received over \$58,000,000 in net new investment during this time while creating 151 new jobs. The zone's labor force increased over 4% with the county average wage increasing 14.76%.

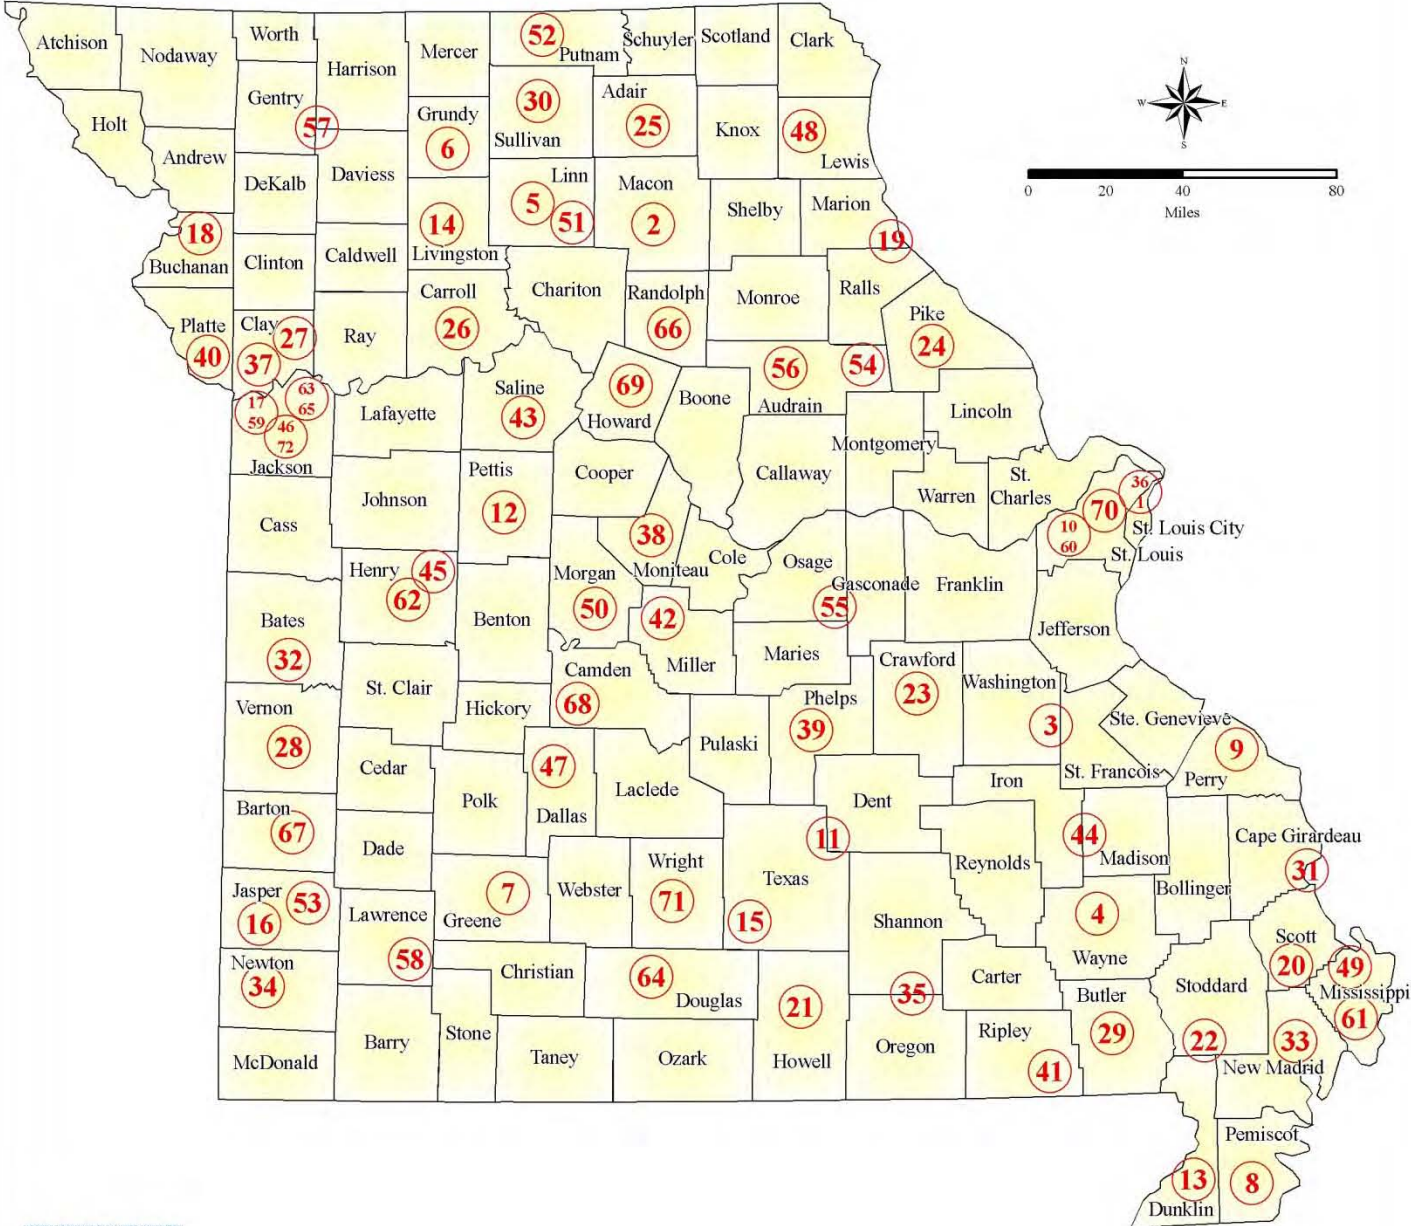

Ava's enterprise zone (zone 64) received nearly \$100,000,000 in net new investment during this time while creating 237 new jobs. The zone's labor force increased over 2% with the county average wage increasing 13.5%.

Lamar's enterprise zone (zone 67) received nearly \$50,000,000 in net new investment during this time while creating 84 new jobs. The county average wage increased 10%.

*Net new investments and net new jobs represent those companies reporting increased investment and job creation over the previous year's filing.
